KRITI CHANDRA

+91-6201968332 kriti012305@gmail.com kriti-chandra KritiChandra11

EDUCATION

- **Vellore Institute of Technology, Vellore** 2022-*Present*
  B. Tech in Computer Science and Engineering *7.18 CGPA*
- **Dhruva Public School, Delhi** 2020-2022
  Class- XII, Central Board of Secondary Education *72 %*
- **St. Michael's High School, Patna** 2010-2020
  Class- X, Central Board of Secondary Education 78.8%

WORK EXPERIENCE

TURING *February 2026 – March 2026*

C++ LLM Trainer

- Evaluated and improved LLM-generated solutions for competitive programming problems using C++
- Reviewed problem statements and validated correctness, constraints, and edge cases
- Performed quality checks and ensured consistency between implementations and datasets

PROJECTS

Distributed Transaction Orchestrator (SAGA) for Payment Systems | Github-Link *February 2026 – March 2026*

- Engineered a **microservices-based** order processing platform implementing the SAGA pattern for **distributed transactions** across Order, Payment, and Stock services with 99.9% reliability.
- Architected event-driven system using **Apache Kafka Streams** for real-time order orchestration, compensation logic, and state management across autonomous services.
- Optimized throughput with parallel Kafka topic consumption, H2 in-memory database caching, and **fault-tolerant message acknowledgment strategies** (25ms average latency per transaction).
- Implemented secure REST APIs (11 endpoints) with JWT authentication, **role-based access control, and comprehensive validation for payment and inventory operations.**

Technologies Used: Java 21, Spring Boot 3.2.5, Apache Kafka, Kafka Streams, RESTful APIs, Docker, H2 Database, CI/CD Pipelining

Time Shift Web Analyzer| Github Link *July 2025 -August 2025*

- Designed and developed **TimeShift Web Analyzer, a tool to help users explore and understand how websites evolve over time through intuitive visualizations of historical data.**
- Translated complex **web archive data into user-friendly insights** using **simhash-based change detection**, enabling users to identify meaningful content changes across **800+ snapshots.**
- Improved user experience by implementing **real-time progress tracking** and asynchronous processing feedback, reducing uncertainty during long-running analysis tasks.
- Designed **interactive data visualizations (timeline charts, metrics cards**) using Chart.js to present change frequency, version diversity, and temporal patterns in a clear and accessible format.
- Focused on making large-scale historical data understandable and actionable through **clear visual hierarchy and structured presentation.**

Technologies Used: Go, Redis, JavaScript, Chart.js, REST APIs, Docker

AI Placement Interview Trainer (RAG-Based)| Github Link *July 2025 -August 2025*

- Built a full-stack **RAG-based GenAI application** to centralize technical interview preparation, allowing users to upload subject-specific PDFs (DBMS, OS, OOPS, DSA) and receive context-aware answers strictly grounded in retrieved content
- Designed an end-to-end RAG pipeline using SentenceTransformer embeddings (all-MiniLM-L6-v2) and FAISS (IndexFlatL2) **for semantic similarity search, implementing intelligent chunking** and persistent **vector storage** to enable sub- **S**econd retrieval across 1000+ document chunks.
- Integrated **OpenAI GPT APIs** with contextual prompt injection to generate interview-style explanations, mock questions, flashcards, and AI-driven answer evaluation with scoring (0–100) and structured feedback based on semantic similarity comparison

Technologies Used: Python, FastAPI, React.js, SentenceTransformers, FAISS, OpenAI API, PyPDF, NumPy, REST APIs, RAG Architecture, Docker, Git

TECHNICAL SKILLS AND INTERESTS

- **Languages:** SQL, Python, Java, Go, C++, JavaScript
- **Databases & Storage:** MySQL
- **Frameworks & Libraries**: Spring Boot, React.js, Next.js, Node.js, Express.js, Redux, FastAPI
- **AI / Machine Learning / NLP:** Retrieval-Augmented Generation (RAG), LLM Integration, Sentence Transformers, FAISS, HuggingFace Transformers, OpenAI APIs
- **Backend & System Design:** Microservices Architecture, RESTful APIs, Distributed Systems, Event-Driven Architecture, SAGA Pattern
- **Messaging & Streaming:** Apache Kafka, Kafka Streams
- **DevOps & Tools:** Docker, Git, GitHub, CI/CD Pipelines, Postman
- **Core Concepts**: Data Structures & Algorithms, OOP, Operating Systems, RDBMS

CODING PROFILES

- **Codeforces:** pupil, max rating 1204 View Profile
- **CodeChef:** 3 stars, max rating 1736 View Profile

ACHIEVEMENTS

- **Finalist**, Internal Hackathon (Gravitas) *October, 2024*
- **Top 50 Teams**, ISSAC Hackathon *September, 2024*

CERTIFICATIONS

IBM Gen-Ai: View Certificate

Azure Fundamentals (AZ-900): View Certificate
